INFORMATION TO BE INCLUDED IN FORM ECSRC-OR

1. **Financial Statements**

Provide Financial Statements for the period being reported in accordance with International Accounting Standards. The format of the financial statements should be similar to those provided with the registration statement. Include the following:

- (a) Condensed Balance Sheet as of the end of the most recent financial year and just concluded reporting period.
- (b) Condensed Statement of Income for the just concluded reporting period and the corresponding period in the previous financial year along with interim three, six and nine months of the current financial year and corresponding period in the previous financial year.
- (c) Condensed Statement of Cash Flows for the just concluded reporting period and the corresponding period in the previous financial year along with the interim three, six and nine months of the current financial year and the corresponding period in the previous financial year.
- (d) By way of *Notes to Condensed Financial Statements*, provide explanation of items in the financial statements and indicate any deviations from generally accepted accounting practices.

2. **Management's Discussion and Analysis of Financial Condition and Results of Operation.**

Discuss the reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations during the reporting period. Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated. Discussion of material changes should be from the end of the preceding financial year to the date of the most recent interim report.

The Management's Discussion and Analysis should disclose sufficient information to enable investors to judge:

1. The quality of earnings;
2. The likelihood that past performance is indicative of future performance; and
3. The issuer's general financial condition and outlook.

It should disclose information over and above that which is provided in the management accounts and should not be merely a description of the movements in the financial statements in narrative form or an otherwise uninformative series of technical responses. It should provide management's perspective of the company that enables investors to view the business from the vantage point of management.

The discussion should focus on aspects such as liquidity; capital resources; changes in financial condition; results of operations; material trends and uncertainties and measures taken or to be taken to address unfavourable trends; key performance indicators; and nonfinancial indicators.

General Discussion and Analysis of Financial Condition

At the end of the quarter, March 2021, the Financial Condition of the Bank was as follows:

- 1) The Bank's total asset base increased by \$274.2 million or 8.3% to \$3.579 billion when compared with \$3.305 billion reported at June 2020, due mainly to the following:
 - Increase in Treasury Bills (accrued interest) by 1.6 million or 3.1%
 - Increase in Cash and balances with Central Bank by \$35.6 million or 19.3%
 - Increase in Loans & Advances by \$50.4 million or 6.2%
 - Increase in Investments by \$269.7 million or 28.0%

Offset by,

- Decrease in Financial Asset by \$3.6 million or 0.6%
- Decrease in Originated Debts by \$13.0 million or 9.5%
- Decrease in Deposits with other financial institutions by \$66.3 million or 14.6%

Cash and balances with Central Bank constituted 6.2% of the total assets, Investments constituted 51.0%, loans and advances contributed to 24.3%, Lands held (financial asset) constituted 15.8%, while all other assets comprised of 2.7% at March 31, 2021. The investment strategy applied by the Bank ensures that it maintains a well-diversified portfolio to reduce risk exposure.

- 2) Net Loans and advances as at March 31, 2021 increased by \$50.4 million or 6.2% when compared with \$819.3 million at June 2020. During the review period, the Bank continued to grow the loan portfolio through its "Last Lap" loan promotion as well as other loan strategies.
- 3) Customers' deposits increased by \$17.8 million or 0.65% when compared with \$2.728 billion reported at June 2020. The Bank has seen an improvement in Deposits following an increase in account balances maintained by Correspondent banks in the region and other large local depositors. Below is a diagram showing the customer deposit mix at the end of March 31, 2021.
- 4) Shareholders' Equity continued on its upward trend, rising significantly by \$212.5 million or 39.4% when compared with \$539.1 million at June 2020. The increase resulted from unrealized gains on FVOCI investments of \$22.2 million (net of tax), profit reported at the end of the quarter of \$208.4 million; offset by a realized loss of \$18.1 million on disposal of FVOCI Equity securities.

The Company continues to closely monitor market and other risks to ensure that it realizes its goal of providing satisfactory returns to shareholders, thereby increasing the value of their investments.

The Bank had contractual commitments to extend credit to customers resulting from loan and credit card facilities granted and Letters of Credit arrangements with customers at the end of the review period. At March 2021, Letters of Credit obligations stood at \$6.4 million, which was the same as the amount reported at June 2020, while loan and credit card commitments stood at \$46.6 million, an increase of \$9.8 million or 26.8% resulting from new credit facilities granted.

Results of Operations

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.

- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

Discussion of Liquidity and Capital Resources

LIQUIDITY

The Bank's liquidity is managed and monitored on a daily basis by management to ensure that there is sufficient liquidity to meet its liabilities when they fall due, both under normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation. The Bank maintains a portfolio of marketable assets that can be easily liquidated as protection against unforeseen liquidity problems, as well as cash and balances with the Central Bank and other financial institutions. At the end of the review period, Cash and balances with Central Bank stood at \$220.6 million, \$65.6 million more than the required reserve deposit of \$155.0 million.

The Bank reported positive cash and cash equivalents of \$421.8 million at the end of March 2021, despite a reduction of \$15.6 million when compared to June 2020.

The Bank continues in its efforts to maintain its liquidity during these challenging times. During the quarter in review, the Bank has seen an improvement in its liquidity position which had tightened during the early months of the pandemic period. An increase in customers deposit balances, especially those of the Public sector and Correspondent banks, has driven this improvement in liquidity. The bank continues to maintain a reasonable level of marketable assets that can be easily liquidated as protection against unforeseen liquidity problems.

The Bank has increased its focus on remaining liquid during these challenging times and has also strengthened its capability to manage liquidity risk by integrating stress-testing into its management processes. Weekly cash flow forecasting is also being done to continually monitor liquidity needs and mitigate liquidity risks.

Customer Deposit Mix

Liquidity and Capital Resources

Provide a narrative explanation of the following (but not limited to):

- i) The reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations.
- ii) Any known trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the issuer's liquidity increasing or decreasing in any material way. If a deficiency is identified, indicate the course of action that the reporting issuer has taken or proposes to take to remedy the deficiency.
- iii) The issuer's internal and external sources of liquidity and any material unused sources of liquid assets.
- iv) Provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation such as adverse changes in the issuer's financial ratios, earnings, cash flows or stock price or changes in the value of underlying, linked or indexed assets.
- v) Circumstances that could impair the issuer's ability to continue to engage in transactions that have been integral to historical operations or are financially or operationally essential or that could render that activity commercially impracticable such as the inability to maintain a specified level of earnings, earnings per share, financial ratios or collateral.

- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

Discussion of Liquidity and Capital Resources

LIQUIDITY

The Bank's liquidity is managed and monitored on a daily basis by management to ensure that there is sufficient liquidity to meet its liabilities when they fall due, both under normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation. The Bank maintains a portfolio of marketable assets that can be easily liquidated as protection against unforeseen liquidity problems, as well as cash and balances with the Central Bank and other financial institutions. At the end of the review period, Cash and balances with Central Bank stood at \$220.6 million, \$65.6 million more than the required reserve deposit of \$155.0 million.

The Bank reported positive cash and cash equivalents of \$421.8 million at the end of March 2021, despite a reduction of \$15.6 million when compared to June 2020.

The Bank continues in its efforts to maintain its liquidity during these challenging times. During the quarter in review, the Bank has seen an improvement in its liquidity position which had tightened during the early months of the pandemic period. An increase in customers deposit balances, especially those of the Public sector and Correspondent banks, has driven this improvement in liquidity. The bank continues to maintain a reasonable level of marketable assets that can be easily liquidated as protection against unforeseen liquidity problems.

The Bank has increased its focus on remaining liquid during these challenging times and has also strengthened its capability to manage liquidity risk by integrating stress-testing into its management processes. Weekly cash flow forecasting is also being done to continually monitor liquidity needs and mitigate liquidity risks.

CAPITAL

The Bank's policy is to manage the capital levels based on the underlying risk of its business. Capital adequacy is monitored to ensure compliance with the ECCB's risk-based capital guidelines, which require a minimum ratio for Tier 1 or core capital of 4% to risk weighted assets. Tier 1 Capital is comprised of share capital, statutory reserves, general reserves and retained earnings. At March 31 2021, the Bank's capital remained very strong and far in excess of the regulatory capital adequacy requirements, reporting a Tier 1 capital ratio of 27.6%.

Capital plays an important role against potential risk, and for this reason the Central Bank is moving to enhance banks' capital to provide a margin of safety for depositors and stakeholders by implementing a Basel II/III hybrid standard. The bank is currently in the process of preparing for the implementation of the first phase of the Basel II/III Capital Standard, which is currently targeted for December 2021. The new Basel requirements will place significant emphasis on internal processes for managing risk and management of capital requirements. The Bank is also considering the effects that the introduction of the Basel II/III hybrid standard would have on its capital risk. The Bank has implemented an Enterprise Risk Management approach to ensure that policies and procedures are in place to capture risk on a Bank wide and business line level.

Off Balance Sheet Arrangements

Provide a narrative explanation of the following (but not limited to):

- i) Disclosures concerning transactions, arrangements and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of, or requirements for capital resources.
- ii) The extent of the issuer's reliance on off-balance sheet arrangements should be described fully and clearly where those entities provide financing, liquidity, market or credit risk support, or expose the issuer to liability that is not reflected on the face of the financial statements.
- iii) Off-balance sheet arrangements such as their business purposes and activities, their economic substance, the key terms and conditions of any commitments, the initial on-going relationship with the issuer and its affiliates and the potential risk exposures resulting from its contractual or other commitments involving the off balance sheet arrangements.
- iv) The effects on the issuer's business and financial condition of the entity's termination if it has a finite life or it is reasonably likely that the issuer's arrangements with the entity may be discontinued in the foreseeable future.

The Bank had contractual commitments to extend credit to customers resulting from loan and credit card facilities granted and Letters of Credit arrangements with customers at the end of the review period. At March 2021, Letters of Credit obligations stood at \$6.4 million, which was the same as the amount reported at June 2020, while loan and credit card commitments stood at \$46.6 million, an increase of \$9.8 million or 26.8% resulting from new credit facilities granted.

Results of Operations

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.

Overview of Results of Operations

RESULTS OF OPERATIONS

The Bank's investment portfolio has performed countercyclical to the local economy and has recorded net gains of \$229.6 million at the end of the third quarter of the financial year. This has allowed the Bank to surpass its targeted performance for March 2021 of \$37.7 million, with a profit of \$208.4 million which represents an increase of \$170.7 million when compared to its budget and \$190.2 million increase when compared with \$18.2 million reported at March 31, 2020.

Outlined below is a summary of the results of operations at the end of March 2021 and March 2020.

	Mar 2021	Mar 2020	
	\$mil	\$mil	% Change
Income from Loans & Advances	21.4	21.8	-1.8%
Income from Investments	9.1	12.8	-28.9%
Income from Deposits with financial Inst.	0.8	2.9	-72.4%
Income from Lands	6.8	13.6	-50.0%
Non-interest income	250.9	44.3	466.4%
Total income	289.0	95.4	202.9%
Interest Expenses	38.4	37.2	3.2%
Non-interest expenses	42.2	40.0	5.5%
Total expenses	80.6	77.2	4.4%
Net Income before taxes	208.4	18.2	1,045.0%

Net-interest Income

Net interest income decreased by \$14.1 million or 102.2% at the end of March 2021 when compared with the \$13.8 million recorded for the same period in 2019. The decrease in net interest income was due to a \$1.2 million increase in interest expense coupled with a \$12.9 million decrease in interest income.

The year-over-year decrease in interest income resulted from the reduction in interest income from:

- investments following a reduction in market interest rates on fixed income securities
- deposits with financial institutions following the closure of liquid deposits
- Financial Asset (Gov't lands) following payments received to reduce the outstanding balance and a reduction in the interest rate on the outstanding balance.

Net Fees & Commission Income

Net fees and commission income fell by \$5.5 million (or 654.2%) at the end of March 2021 when compared with the amount attained for the quarter ended March 31, 2020. The year-over-year decrease in net fees and commission income was due mainly to a decrease in commission on debit cards and prepaid fees by \$1.1 million, E-business commissions by \$0.7 million, service charges on exceeding OD limits by \$0.5 million, service charge on wire transfers \$0.3 million; coupled with an

- iv) Known events that will cause a material change in the relationship between costs and revenues (such as price increases, costs of labour or materials), and changes in relationships should be disclosed.
- v) The extent to which material increases in net sales or revenues are attributable to increases in prices or to increases in the volume or amount of goods or services being sold or to the introduction of new products or services.
- vi) Matters that will have an impact on future operations and have not had an impact in the past.
- vii) Matters that have had an impact on reported operations and are not expected to have an impact upon future operations
- viii) Off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships that have or are reasonably likely to have a current or future effect on the registrant's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.
- ix) Performance goals, systems and, controls.

increase in fee expenses by \$2.9 million

Other Income

Income from other sources showed a significant increase of \$193.6 million or 203.0% for the period ended March 2021 when compared to the amount recorded for the same period ended March 2020. The rise in other income was mainly the result of an increase in net gains on equity securities of \$146.4 million. The table below gives an analysis of revenues earned over the review period."

<i>Analysis of Revenue</i>	Mar 2021	Mar 2020	
Interest Income	\$ 000	\$ 000	% Change
Interest from loans and advances	21,412	21,821	-1.9%
Interest from Investments	7,422	11,045	-32.8%
Interest from Treasury Bills	1,689	1,716	1.6%
Interest from Deposits with Fin. Inst.	823	2,884	-71.4%
Interest on Lands	6,797	13,597	-50.0%
Total interest	38,143	51,063	-25.3%
Non-interest income			
Income from fees and commissions	11,813	14,422	-18.1%
Gains from foreign exchange	4,409	4,827	-8.7%
Gains from investments, net	229,602	19,174	1,097.4%
Dividend income	4,575	5,817	-21.4%
Expected credit losses	-	-	-
Other income	475	91	422.0%
Total non-interest income	250,874	44,331	465.9%
Total Revenue	289,017	95,394	203.0%

Operating Expenses

Operating expenses incurred at the end of March 2021 was \$25.7 million when compared to \$26.4 million at the end of March 2020, representing a decrease of \$0.7 million or 2.7%. Operating cost management and curtailment remains a critical area of focus for the bank.

Operating Income

Over the past 5 years, operating income before tax failed to trend in the same direction. Operating income before tax moved slightly downwards by \$3.2 million from March 2017 to March 2018. However, operating income rose to \$33.3 million at March 2019 from the amount of \$25.3 million reported at the end of March 2018, before dipping to \$18.2 million at March 2020. At the end of March 2021, operating income grew by leaps and bounds to \$208.4 million, following another impressive quarterly stock market performance. The Company is optimistic that its continued efforts to augment the non-interest income base and curtail interest costs will result in a significant improvement in profitability over the next quarter and beyond.

Outlined below is the movement of net operating income for period ended March 31st over a five year period.

OUTLOOK

The Directors and Management of National Bank will continue to place strong emphasis on our strategic objectives of disciplined growth, risk reduction, improved asset quality, efficiently and effectively leveraging technology and augmenting our service-oriented culture whilst still fostering an enabling environment for employees and improving the community we serve.

We will continue to invest substantially in technology that will bring enhanced benefits to our customers and in human capacity building. We believe that this focus will enable us to successfully combat the challenges ahead and remain profitable.

3. Disclosure about Risk Factors.

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalized statements. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

The management of risks has emerged as one of the greatest challenges that banks now face, especially during the pandemic period. The Bank's activities expose it to a variety of financial risks, as taking risk is core to the commercial banking business. Management is aware that operational risks are an inevitable consequence of being in business, and hence risk management policies are designed to identify and analyze risks in order to set appropriate levels and controls to monitor and mitigate risks. Risk management is carried out by the Credit and Finance Divisions under policies approved by the Board of Directors. In addition, internal audit is responsible for the independent review of risk management and the control environment.

The types of risks that affect the Bank are credit risk, liquidity risk, market risk (interest rate and currency risk), insurance risk and other operational risks.

Credit Risk

Credit risks can have a great impact on the results from operations or on financial conditions due to the industry in which we operate. The Bank takes on exposure to credit risk, which is the risk that counter-parties will cause financial losses for the bank by failing to discharge their obligations. Credit exposure arises principally in lending activities that lead to loans and advances and investment activities that bring debt securities and other bills into the Bank's asset portfolio.

The Bank's credit risk remains 'high' based primarily on the level of non-productive loans and advances which continue to remain far above the prescribed acceptable limit. The projected improvement in economic growth following the reopening of countries and the distribution of various vaccines could trigger reduced credit defaults and improvement in credit quality for customers previously affected by the pandemic, due to financial recovery in the medium to long term. As economic activity is not expected to improve in the Tourism industry until 2022 and 2023, there is little likelihood that the non-performing loans held by the Bank in the Tourism sector will show improvement in quality. However, the Bank has been working assiduously to reduce the level of non-productive loans and actions to maintain resilience and further strengthen the credit risk management framework is being undertaken by Management. We continue to monitor the credit portfolio to assess the impact that COVID-19 has and may continue to inflict on the credit quality and collateral quality of affected customers.

Market/Investment Risk

The Bank is exposed to market risk, which is the risk that fair values or future cash flows will fluctuate because of changes in market prices. The Bank holds investments in open positions in

interest rate and equity products, all of which are exposed to general and specific market movements and changes in market rates or prices such as interest rates, equity prices and foreign exchange rates. As risks from future market uncertainty cannot be avoided, it is being mitigated in the investment portfolio by maintaining an appropriate mix of equities and bonds that reflect the Bank's comfort with market volatility. Exposure to investment risk is managed by diversifying the investment portfolio of the Bank to mitigate volatility of stocks in different sectors.

Stocks posted solid gains in March 2021, ignited by improving economic conditions and broadened vaccine programs. The month began strong, but the enthusiasm faded when Fed Chair, Jerome Powell, voiced his concerns about future inflationary pressures. Stocks resumed their advance, aided by the signing of the \$1.9 trillion stimulus bill and encouraging economic reports, before volatility picked up in the second half of the month as higher yields on 10-year Treasury securities placed pressure on technology and high-growth stocks causing investors to rotate into other sectors. The volatility continued late into the month, nonetheless stocks ended March 2021 on a strong note to cap an otherwise good month for investors.

Management, with the assistance of highly competent and experienced fund advisers, continue to closely monitor the market and our investment portfolio in order to mitigate potential risks.

Liquidity Risk

Liquidity risk, to which the Bank is also exposed, is the risk that the bank is unable to meet its payment obligations when they fall due and fulfill commitments to lend. Sources of liquidity are regularly monitored, and the bank holds a diversified portfolio of cash and investment securities to support payment obligations.

The Bank has seen an improvement in liquidity over the past few months, following an increase in account balances held by Correspondent banks in the region and other large local depositors. The future growth of the loan portfolio projected from the recent approval of large loans for Corporate customers may require an additional future drawdown from the available line of credit held, when disbursed. The Bank continues to maintain marketable assets that can be easily liquidated to meet demands. Liquidity is closely monitored to ensure that sufficient funds are available at all times to meet any demands for funds, with increased focus placed on monitoring with the recent implementation of a weekly cash flow forecast.

Interest Rate Risk

The Bank is exposed to interest rate risk, which is the risk that future cash flows or the value of a financial instrument will fluctuate because of changes in market interest rates. The bank has deposit liabilities that are of a shorter maturity than loans, which means that deposits are repriced faster than loans. Each time a deposit matures, there is the risk of interest rates rising and the Bank having to pay a higher interest rate on them. However, loans with longer maturities cannot be repriced that easily, creating an interest repricing gap. As at March 2021, the Bank held 2.75 billion in short term deposits that can be easily repriced. Globally, short term interest rates remain below 1%.

4.

Legal Proceedings.

A legal proceeding need only be reported in the ECSRC – OR filed for the period in which it first became a reportable event and in subsequent interim reports in which there have been material developments. Subsequent Form ECSRC – OR filings in the same financial year in which a legal proceeding or a material development is reported should reference any previous reports in that year. Where proceedings have been terminated during the period covered by the report, provide similar information, including the date of termination and a description of the disposition thereof with respect to the reporting issuer and its subsidiaries.

None

5. Changes in Securities and Use of Proceeds.

(a) Where the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved. State briefly the general effect of such modification upon the rights of holders of such securities.

None

(a) Where the use of proceeds of a security issue is different from that which is stated in the registration statement, provide the following:

- Offer opening date (provide explanation if different from date disclosed in the registration statement)

- Offer closing date (provide explanation if different from date disclosed in the registration statement)

- Name and address of underwriter(s)

- Amount of expenses incurred in connection with the offer

- Net proceeds of the issue and a schedule of its use

- Payments to associated persons and the purpose for such payments

(c) Report any working capital restrictions and other limitations upon the payment of dividends.

None

6.

Defaults upon Senior Securities.

- (a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund instalment, or any other material default not satisfied within 30 days, with respect to any indebtedness of the reporting issuer or any of its significant subsidiaries exceeding 5 per cent of the total assets of the reporting issuer and its consolidated subsidiaries, identify the indebtedness. Indicate the nature of the default. In the case of default in the payment of principal, interest, or a sinking or purchase fund instalment, state the amount of the default and the total arrears on the date of filing this report.
- (b)

None

- (c) If any material arrears in the payment of dividends have occurred or if there has been any other material delinquency not satisfied within 30 days, give the title of the class and state the amount and nature of the arrears or delinquency.

None

7. Submission of Matters to a Vote of Security Holders.

If any matter was submitted to a vote of security holders through the solicitation of proxies or otherwise during the financial year covered by this report, furnish the following information:

- (a) The date of the meeting and whether it was an annual or special meeting.

None

- (b) If the meeting involved the election of directors, the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

None

- (c) A brief description of each other matter voted upon at the meeting and a statement of the number of votes cast for or against as well as the number of abstentions as to each such matter, including a separate tabulation with respect to each nominee for office.

None

- (d) A description of the terms of any settlement between the registrant and any other participant.

8.

None

(e) Relevant details of any matter where a decision was taken otherwise than at a meeting of such security holders.

None

Other Information.

The reporting issuer may, at its option, report under this item any information, not previously reported in a Form ECSRC – MC report (used to report material changes), with respect to which information is not otherwise called for by this form, provided that the material change occurred within seven days of the due date of the Form ECSRC-OR report. If disclosure of such information is made under this item, it need not be repeated in a Form ECSRC – MC report which would otherwise be required to be filed with respect to such information or in a subsequent Form ECSRC – OR report.
