The overall sustainability of the ECCSD is predicated on its ability to generate sufficient fee income from its core activities of clearing and settling primary and secondary market transactions.

Transactions within the ECCSD continue to be dominated by primary market activity on the RGSM. In the financial year ended 31 March 2020, transactions in Sovereign debt securities on the primary market accounted for 99.0% of total depository activity. The secondary market transactions accounted for 1.0% of overall depository activity.

The ECCSD's heavy reliance on sovereign issuers, requires an active RGSM. In the most recent past, several of the ECCU member Governments continue to face debt sustainability challenges, one Government underwent a debt restructuring exercise in 2015 (This particular government has made strong progress in ameliorating its fiscal management practices and condition) and another restructured its debt in 2012.

The impact of debt restructuring, should they become more prevalent and continue to involve substantial haircuts, could adversely affect RGSM activity. Any significant reduction in RGSM activity would negatively affect the ECCSD's performance.
